

Recommendations for cycle parking to the Borough of Richmond on Thames
Location: Whitton High Street
14 October 2013

Note: our proposals for parking at this and other localities in the borough are based upon the current issue of TfL's London Cycling Design Standards, Chapter 8, Cycle Parking.

Between Whitton Station and the northern end of the High Street there are currently 18 stands, single or in groups, distributed on both sides of the road. The distance is about 400m.

Number of additional stands on both sides of the road, assuming groups of two, to meet the TfL specification of parking within 25m (i.e. 50m spacing) = **18 approximately**. This requires a detailed survey.

We also propose **4 stands** at the front of Lidl, **4 stands** at the front of Tesco and **3 stands** outside Action Bikes. These may be included in the additional 18 or not depending on the detailed design.

Also

At the end of Library Way: **2 extra stands** outside the library

In Nelson Road at the corner of Vincent Road: **1 stand** outside the corner shop.

At Whitton Station: **10 additional stands** (to double the existing number)

In Percy Road by Jubilee Avenue: **5 additional stands** (to double the existing number). These appear to be used for mainly station parking.

In Bridge Way by the group of 5 shops: **2 stands**
